

Every day, our ability to do maths is improving

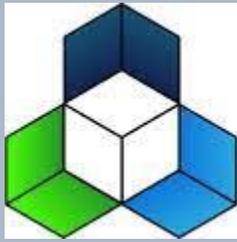

Do you ever wonder what maths looks like at Poplar Street?

These are some of the ways we deliver a varied and challenging maths curriculum at Poplar Street. Helping us deliver our vision for maths daily.

Vision for Maths

To grow confident, resilient and fluent mathematicians who enjoy discovering and developing mathematical skills by building, deepening and applying their knowledge, ready for real-life contexts

Complete Mathematics

This year we will be rolling out a new maths programme that children can access outside of school. As a school we have invested in an online maths tutoring program called 'Complete Maths'. Complete Maths Tutor is the most complete and only truly mastery-based source of online maths tuition. It is delivered by expert maths educators with 1-to-1 instruction and always specific to each individual's needs. TUTOR believes that everyone has mathematical potential and provides a platform outside of school to help children achieve maths mastery. This will run alongside our other online maths programs such as Times Tables Rock Stars and Numbots.

Learning Through Song

A fun and interactive way to help your children with maths at home is through song. YouTube is full of multiplication, counting and subitising videos to help your child learn at home.

Try searching Jack Hartman, Adele 8 times table or Ed Sheeran inverse.
